NAB New Product From Marshall Electronics NAB Booth # SU11614

New 10 screen LCD rack mount with SDI inputs

Las Vegas April 19, 2004: Marshall Electronics will display their unique new 10-screen rackmount; model V-R25P-SDI (MSRP \$4995.00). The V-R25P-SDI includes all hardware for rack mount applications. This model features ten 2.5" TFT active matrix LCD displays and accepts SDI inputs (ITU-R601) with re-clocked loop through. Each display is a matrix of 480 x 234 dots and produces high-resolution images. Like all Marshall rack mounted displays, the V-R25P-SDI can tilt up or down for optimum viewing angle. Weighing less than five pounds, the space saving design is only 3RU high and 2.65 inches deep when installed into an EIA standard 19" rack. Each display features automatic recognition of NTSC/PAL signals. NTSC and Pal signals may be interspersed on the ten screens. Power supply, manual and a dry erase marker for labeling are included.

For further product information please contact our sales department.
