Introducing Marshall RCP Control Unit for POV Cameras

Marshall Electronics' new CV-RCP-100 Remote Touchscreen RCP camera controller allows for remote operation and adjustment of up to seven broadcast POV cameras at one time from 300 meters away using an easy access XLR cable.

Torrance, CA – Marshall Electronics, a leading provider of broadcast cameras and display monitors, announces the release of the new CV-RCP-100 Remote Touchscreen RCP camera controller for broadcast POV cameras. With each camera release brings higher video quality with more broadcast features and now Marshall offers the convenience of remote adjustment from 300 meters away without pulling up the OSD (On-Screen Display) menu. Marshall worked closely with professional broadcast engineers to include multi-brand compatibility and other key features.

“Matching cameras from various manufacturers can be challenging”, states Jeff Silverman, President of Sports Integrator firm, Inertia Unlimited. “The ability to fine tune and adjust our POV cameras without bringing up the OSD menu or leaving the truck is a real game changer.”

The CV-RCP-100 features an intuitive touchscreen interface, designed with intelligent menu and sub-menu layouts, pre-programmed with self-help dialogs, favorites settings, save features and auto-updating firmware. A pair of fine-tune controls enable precision adjustments for white balance, red/blue gain, gamma, brightness, exposure, shutter, frame rate and more. Remote adjustments can be applied globally to multiple cameras simultaneously or individually for each camera. The CV-RCP-100 utilizes an easy and secure locking 3-pin XLR connector for reliable transmission of Visca protocols over RS485/RS232 up to 300 meters away.

The CV-RCP-100 is compatible with all current Marshall ProSeries POV, Zoom Block, and PTZ Cameras, and is pre-programmed with control protocols for popular non-Marshall branded cameras on the market including Sony, AJA, and Panasonic models.

About Marshall Electronics

Marshall Electronics specializes in the development, manufacturing and distribution of technology products used in a wide range of professional applications with five operating units: Marshall Broadcast, MXL Pro Audio, Mogami Cable, Marshall Optical and the new Marshall/MXL Pro A/V Communications Division. Marshall Electronics operates a US design and engineering headquarters with manufacturing facilities in the US, China, Japan, Korea and Russia.
